Name:          Created:          Last Modify:      Created By:
GetInfo.php 03/15/2008          05/20/2008      Ryan Ballard
```

REQUIRED FILES:
SendInfo.php
log.php
payment.php (optional)

PURPOSE:
File creates a form for a user to complete. It checks the form upon submission and gives direction if not completed properly. Once complete properly file calls SendInfo.php to complete. SEE SendInfo.php for rest of process.

HOW TO USE:
Put all required files and this file in a folder called Reservations and provide a include on the selected page you wish this to display.
Example <? include('Reservations/GetInfo.php'); ?>

```
*/
